### Abstract

Film and literature are the artistic expressions of human mind. Man thinks of different ways of communicating human experiences to broaden the enlightenment scenario. At the very outset, nobody takes an interest and favor towards the connection of filming and writing (literature). The relation (connection) of both, film and literature is as old as humanity. The 19th Century is the slow beginning to take an ideal shape of the process of creative exchange between film and literature. Film is such a field which was more related to photography and painting in the beginning. On the contrary, literature was almost restricting to print, which has more or less a permanent shape. Literature consists of different genres - short story, novel, drama and poetry. These all are the written documents, and it is clear that letters are used in literature.
