Research Paper :

Who is cultured? The question is quite baffling. The cultured is one who always carries the culture within him and often demonstrates through ideas, thinking, behaviour and mannerisms. He is the one who has social, political, ethical and religious consciousness. Nation has her own identity through culture where multi-lingual, multi-coloured and multi-racial people exist in peace and

utter silence in India. The culture encompasses unity in diversity and often coexists with the history.

I am Hindu

I am Muslim

I am Shikh

I am Isai

The world within me cries again...

I am black

I am white

I am colonized

Slave to me

The world within me cries again... (Dr. Pramod Ambadasrao Pawar)

History is defined as a record of the past. But it is, in fact, a long silence of the events dug deep into the soil. It relates to the present, past and future. It is a demonstration of culture to the world. One can say that it is a perpetual presence, for example: The Taj at Agra. We walk with history and history with us. It is a factual record of bloodshed, violence, World Wars and political strategies employed in a specific time in the past. It often teaches how the things would have been exposing the reality of buried truth. It represents a mute record of extreme despair in the minds of great warriors and mental debate of good and evil. For example: Nero in Rome who was playing flute when Rome was burning. It talks about the mistakes committed by the great people in the world and warns the world about the future catastrophe. Nobody rests in peace without the study of history.

I sense you all, now or never

That all religions bear fruits

Of oneness wherein

Love tastes sweet

The world within me cries again...

A fertile tree drenched into

Flickering dew

Of love

That begets love to the world

The world within me cries again... (Dr. Pramod Ambadasrao Pawar)

History mirrors politics of a specific time where great national heroes teach the world what history should have been. Man repents when something goes terribly wrong. Nothing is wrong with the history if we uproot evil from it. History represents the civilization of the nation how the civil wars diminish the nation and become the root cause of the fall of nations. The progress of any nation is the attitude of people living in it.

All religions bear the fruits

Of humanity

We all love the world

Within and without

The world within me cries again.....

The world I dwell in

Witnessed two World Wars

All we need is a peace of mind

Third World War rests within

The world within me cries again (Dr. Pramod Ambadasrao Pawar)

The world history will save the world if the peace is mentioned. People have problems, problems lead to the mental anarchy and chaos in a nation. The world is torn into pieces and demands world peace and one world government to save the planet from the unpredictable assaults from other planets. I may say that there is no uniformity in ideas in the world as every nation struggles to prove her supremacy and sovereignty.

No caste, no colours, no creed

Let's be humane to be human

Evil Kills you all

*Beware....time moves on
The world within me cries again....*

*Let's stop violence and bloodshed
All around you and me
Just fasten to the Truth
Of the self*

The world within me cries again...(Dr. Pramod Ambadasrao Pawar)

Different nations have varied cultures and the best culture has to be followed by the world. Let's make one voice of the planet that is mono-lingual, ideal and loving that controls the earth. The world is one, then how can we see the sufferings of the poor?

How can our eyes tolerate bloodshed, violence and fear in a nation? Love conquers the world. Let love reign the world with peace. The world government should resolve the problems of people in all walks of life. No gender discrimination, no religious debates, no black and white issues and no low and high caste stress. Human beings are born free and have the primary right to get everything as they need. All minor problems are critical. That's why; the problems are to be taken into critical consideration. No problem is small or big and therefore all problems are to be handled with love, fear and generosity. The equality should walk along the human beings in the world that may make the world the heaven of the burning hell on the earth. In the past, the people have made mistakes and we generally raise the same questions and let the world burn again. Whatever has happened is gone and rested in history. Our every step in the present is going to be the history. The future of the world is in our hand where history is the only one tool to save the world from human dangers. Today burning questions fire the world and no nation rests in sound sleep. In a sense, we repeat history and history herself laughs at human follies in time.

Our life is history. What we did is history, what we do is history and what we are going to do will be history. Man cannot be separated from history as she

is the mother of human beings. It always teaches, nourishes and warns the dangers to the world. But the world turns deaf ears to the worlds sprung out of history. History repeatedly asks for justice, love and peace. When will man recover from the sickness of evil deeply rooted within the human mind? When will the world witness a golden ray of hope where the dew on the earth smiles at her own silence? How can we let sacrifice go wasted? Martyrs, I mean, who struggle for human welfare. If we study any great hero from the world who has ambition to conquer the world, teach lessons to the world, we may find that people on the divided land are still found in chains and strives hard to break the borders of the nations and exist in peace forever.

The earth loves you all, be the son of it forever. Every person from any nation lives for a specific cause and his actions make his destiny. Once the individual in the nation broadens the mental horizons to see the world as home, he will be happier than happiness he feels in his one nation. Whenever the nation changes, then identity issues sprung out automatically along with culture, language, life system become barriers to cope with the world. Nations are for man and man is not for nations. Men are important in nations who pull the wheel of the culture embedded within them.

All individual problems are social problems; social problems are national problems and national problems are universal ones. Therefore, individual problems should be taken into our serious consideration and resolved in time. That's all...

Life is a tale of adventure

Full of ecstasy and despair

Signifying our actions on the earth

To get rid of birth and death cycle forever

The world within me cries again.... (Dr. Pramod Ambadasrao Pawar)
